SCOPE

CENTRINNO

VISION

Hold true to the ecological challenges of our time

Boost a diverse, inclusive, and innovative urban economy

Use heritage as a catalyst for innovation and social inclusion

MISSION

Rethink the way cities govern their material resources

Foster social inclusion through craftsmanship, culture and heritage

Shape new socio-economic and sustainable identities of industrial historic sites

KEY CONCEPTS

Circularity

Heritage

Social Inclusion

Fab City Hub

Training

Heritage

Choosing features today, with references to the past, in order to design the future

Social Inclusion

Connecting global and local actors through an iterative, inclusive, and user-centred process

Circularity

Redefining growth and generating positive societal and environmental impact

Vocational Training

Connecting training and innovation around diverse and interconnected topics

Fab City Hub

Embodying exploration and prototyping within and beyond the four walls of a physical space
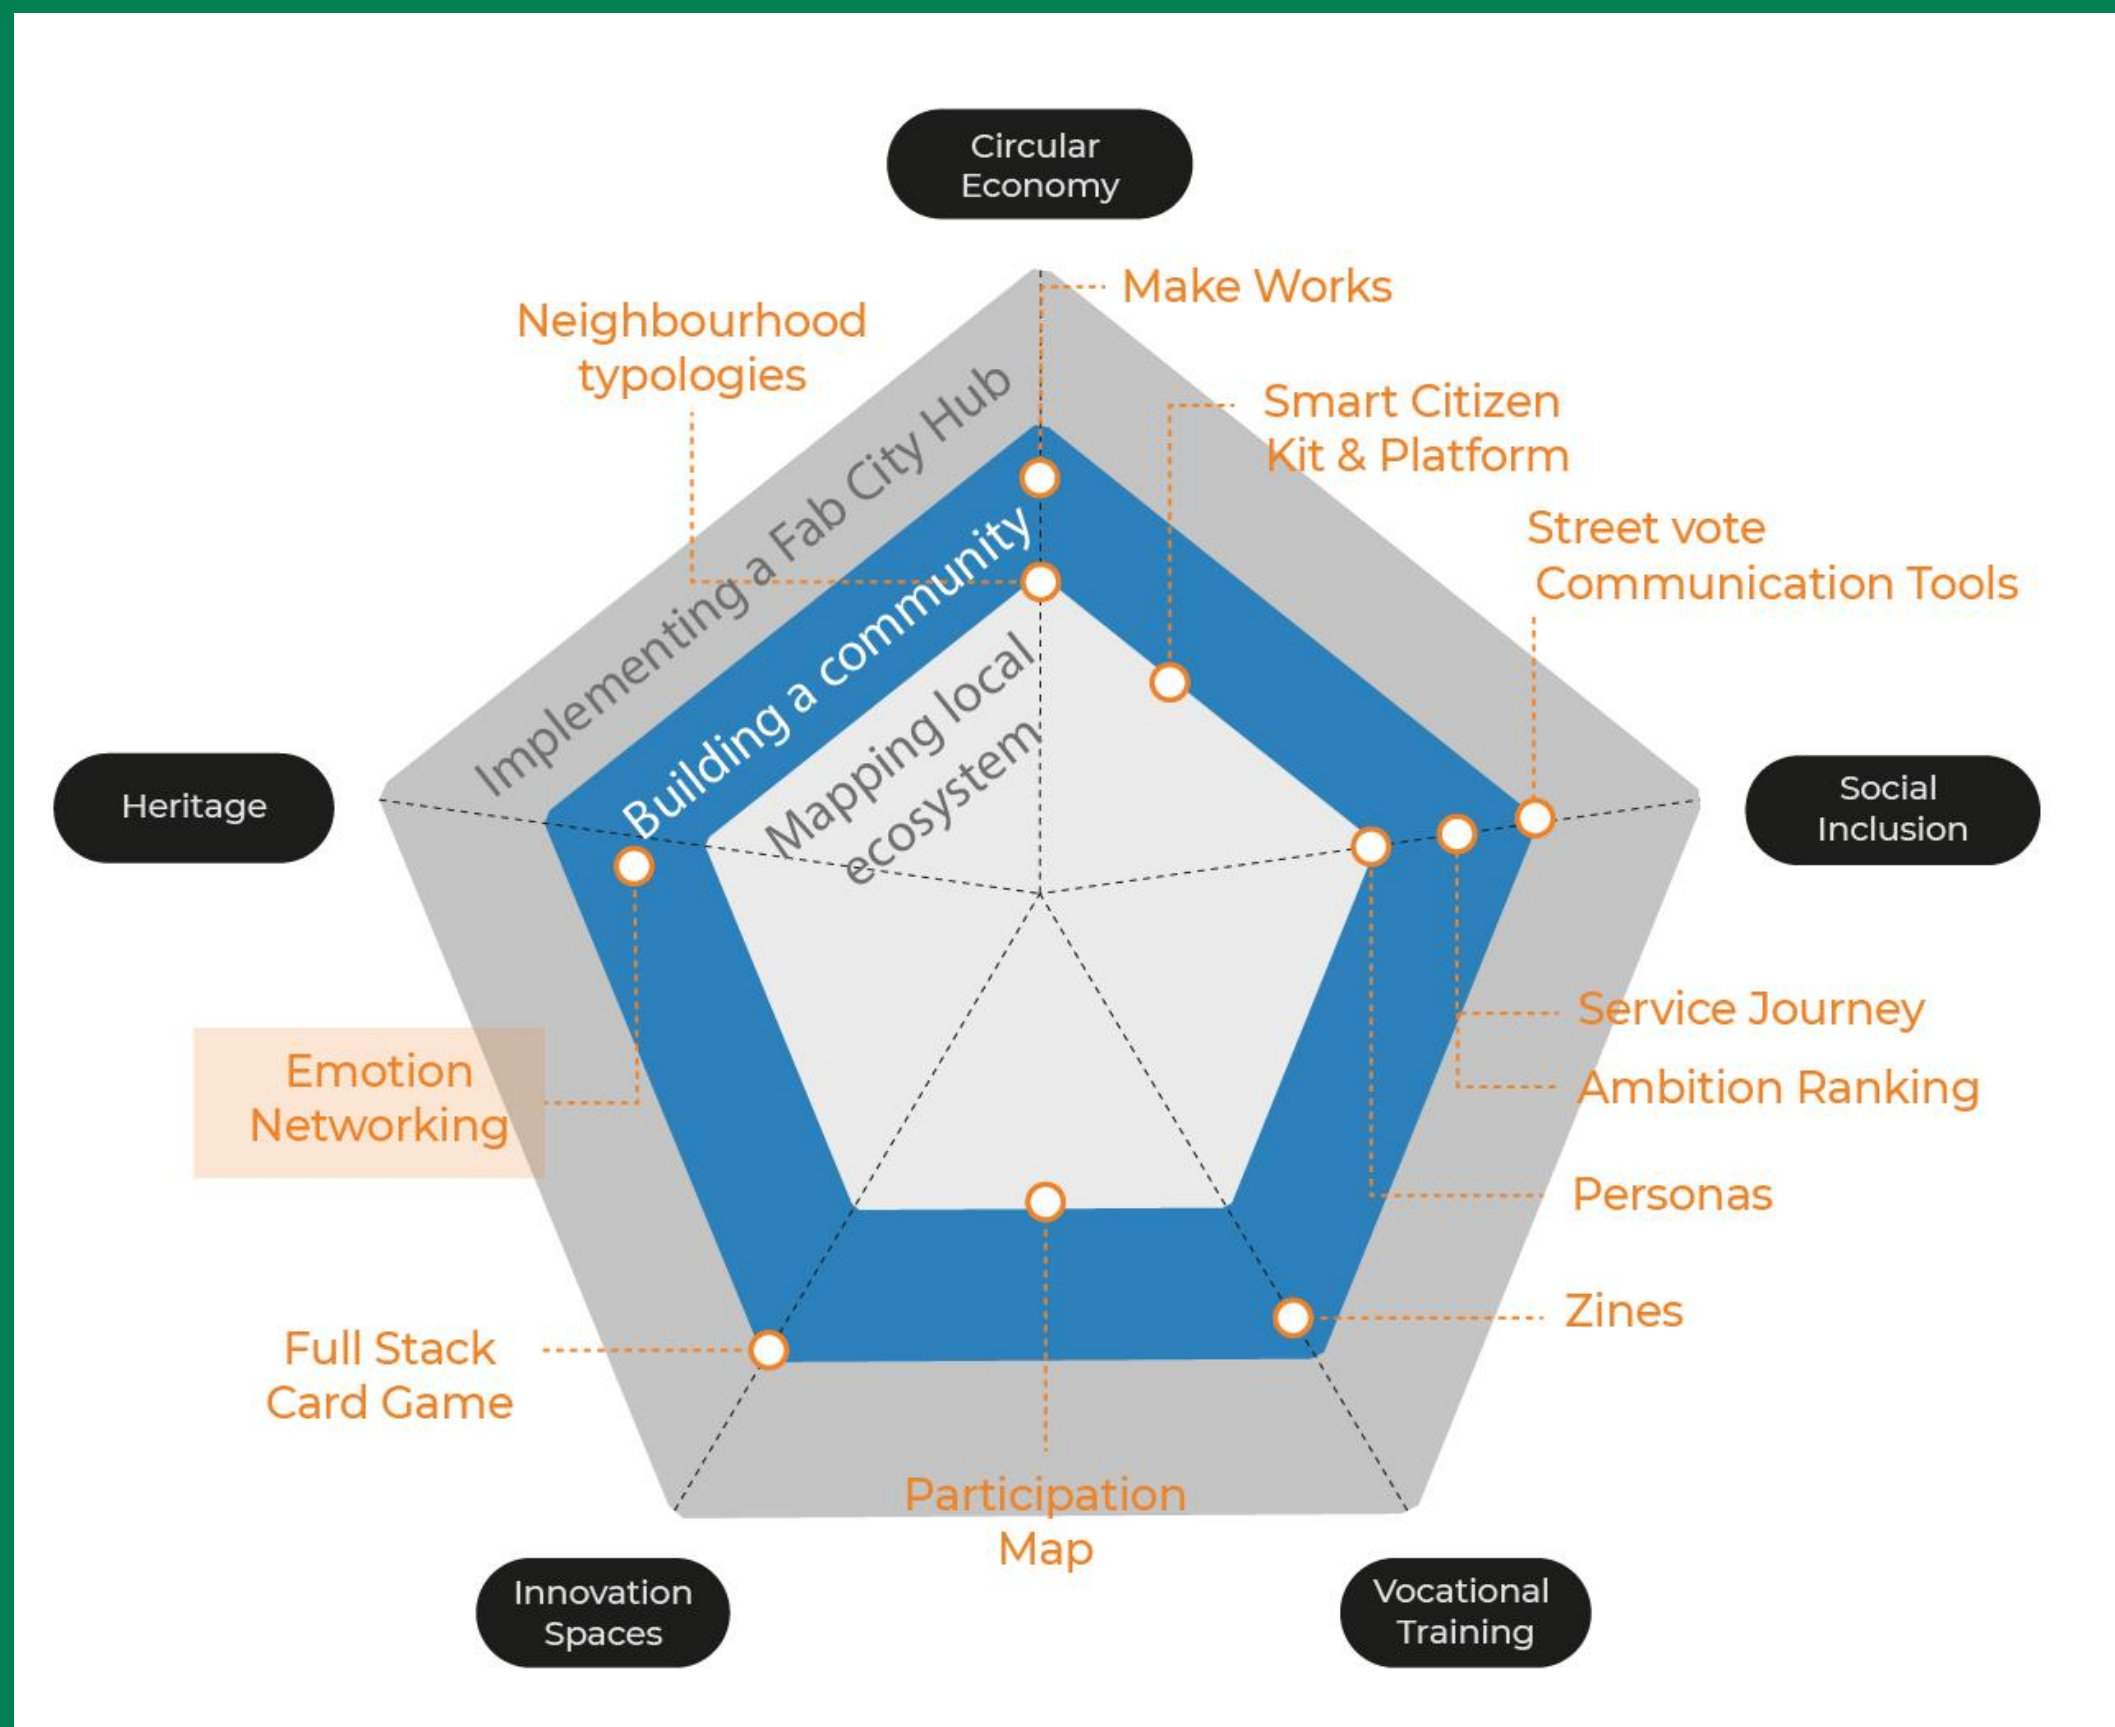

Social Inclusion

Conceptualisation

Current **transformation processes** in historic industrial areas, often in central or strategic metropolitan locations, usually **increase land value and bring new land uses**, producing drastic changes in the physical and social fabric of the city.

Urban transformation process in CENTRINNO should **consider existing population in decision-making** processes, as well as foster social **inclusion of disadvantaged or vulnerable groups**.

Circularity

Heritage

Social Inclusion

Fab City Hub

Training

Social Inclusion

Practice

- Increasing **access and connection** to information, communities, projects and initiatives related to the local **distributed creative and productive ecosystems**.
- Embracing emergence of new needs, projects, and organisations through **open and resilient structures** amidst rapidly changing and hazardous environments.
- **Engaging with** and creating new institutions through **experimentation** and prototyping of diverse **assemblages of actors and functions.**
- Activating **interactions** and facilitating **connections** and collaborations among the different actors active in urban environments.
- Fostering **bottom-up deliberation** for defining the needs and conditions for a **community coalescing around a physical space**
- Enabling **participation** in expression and debate through **inclusive approaches** that give space to citizens and local communities
- Facilitating **community action**, while orchestrating a **common vision.**
