Fab City Network
Network for exchanging knowledge globally

Manifesto

Collectively built, the Fab City Manifesto expresses Fab City's main principles.

- Ten values and principles that the Fab City Global Initiative commits to implement in order to enable the urban transition towards locally productive and globally connected cities.

FULL STACK

A multiscalar framework for distributed
production strategies in cities and regions

- Activates synchronous actions from the bottom-up
  and top-down that complement and interconnect with
  each other.

- Helps cities and regions interpret the Fab City
  challenge and guides them to implement it in a
  multiscalar and ecosystemic approach. It assists cities
  in defining their own Strategic Action Plan that reflects
  their local community and bioregion.

Sharing knowledge with global networks

Applying bioregional strategies

Prototyping placed-based interventions

Orchestrating efforts between local communities and initiatives

Incubating value-generating projects

Enabling new forms of learning

Developing infrastructure and technologies for local production
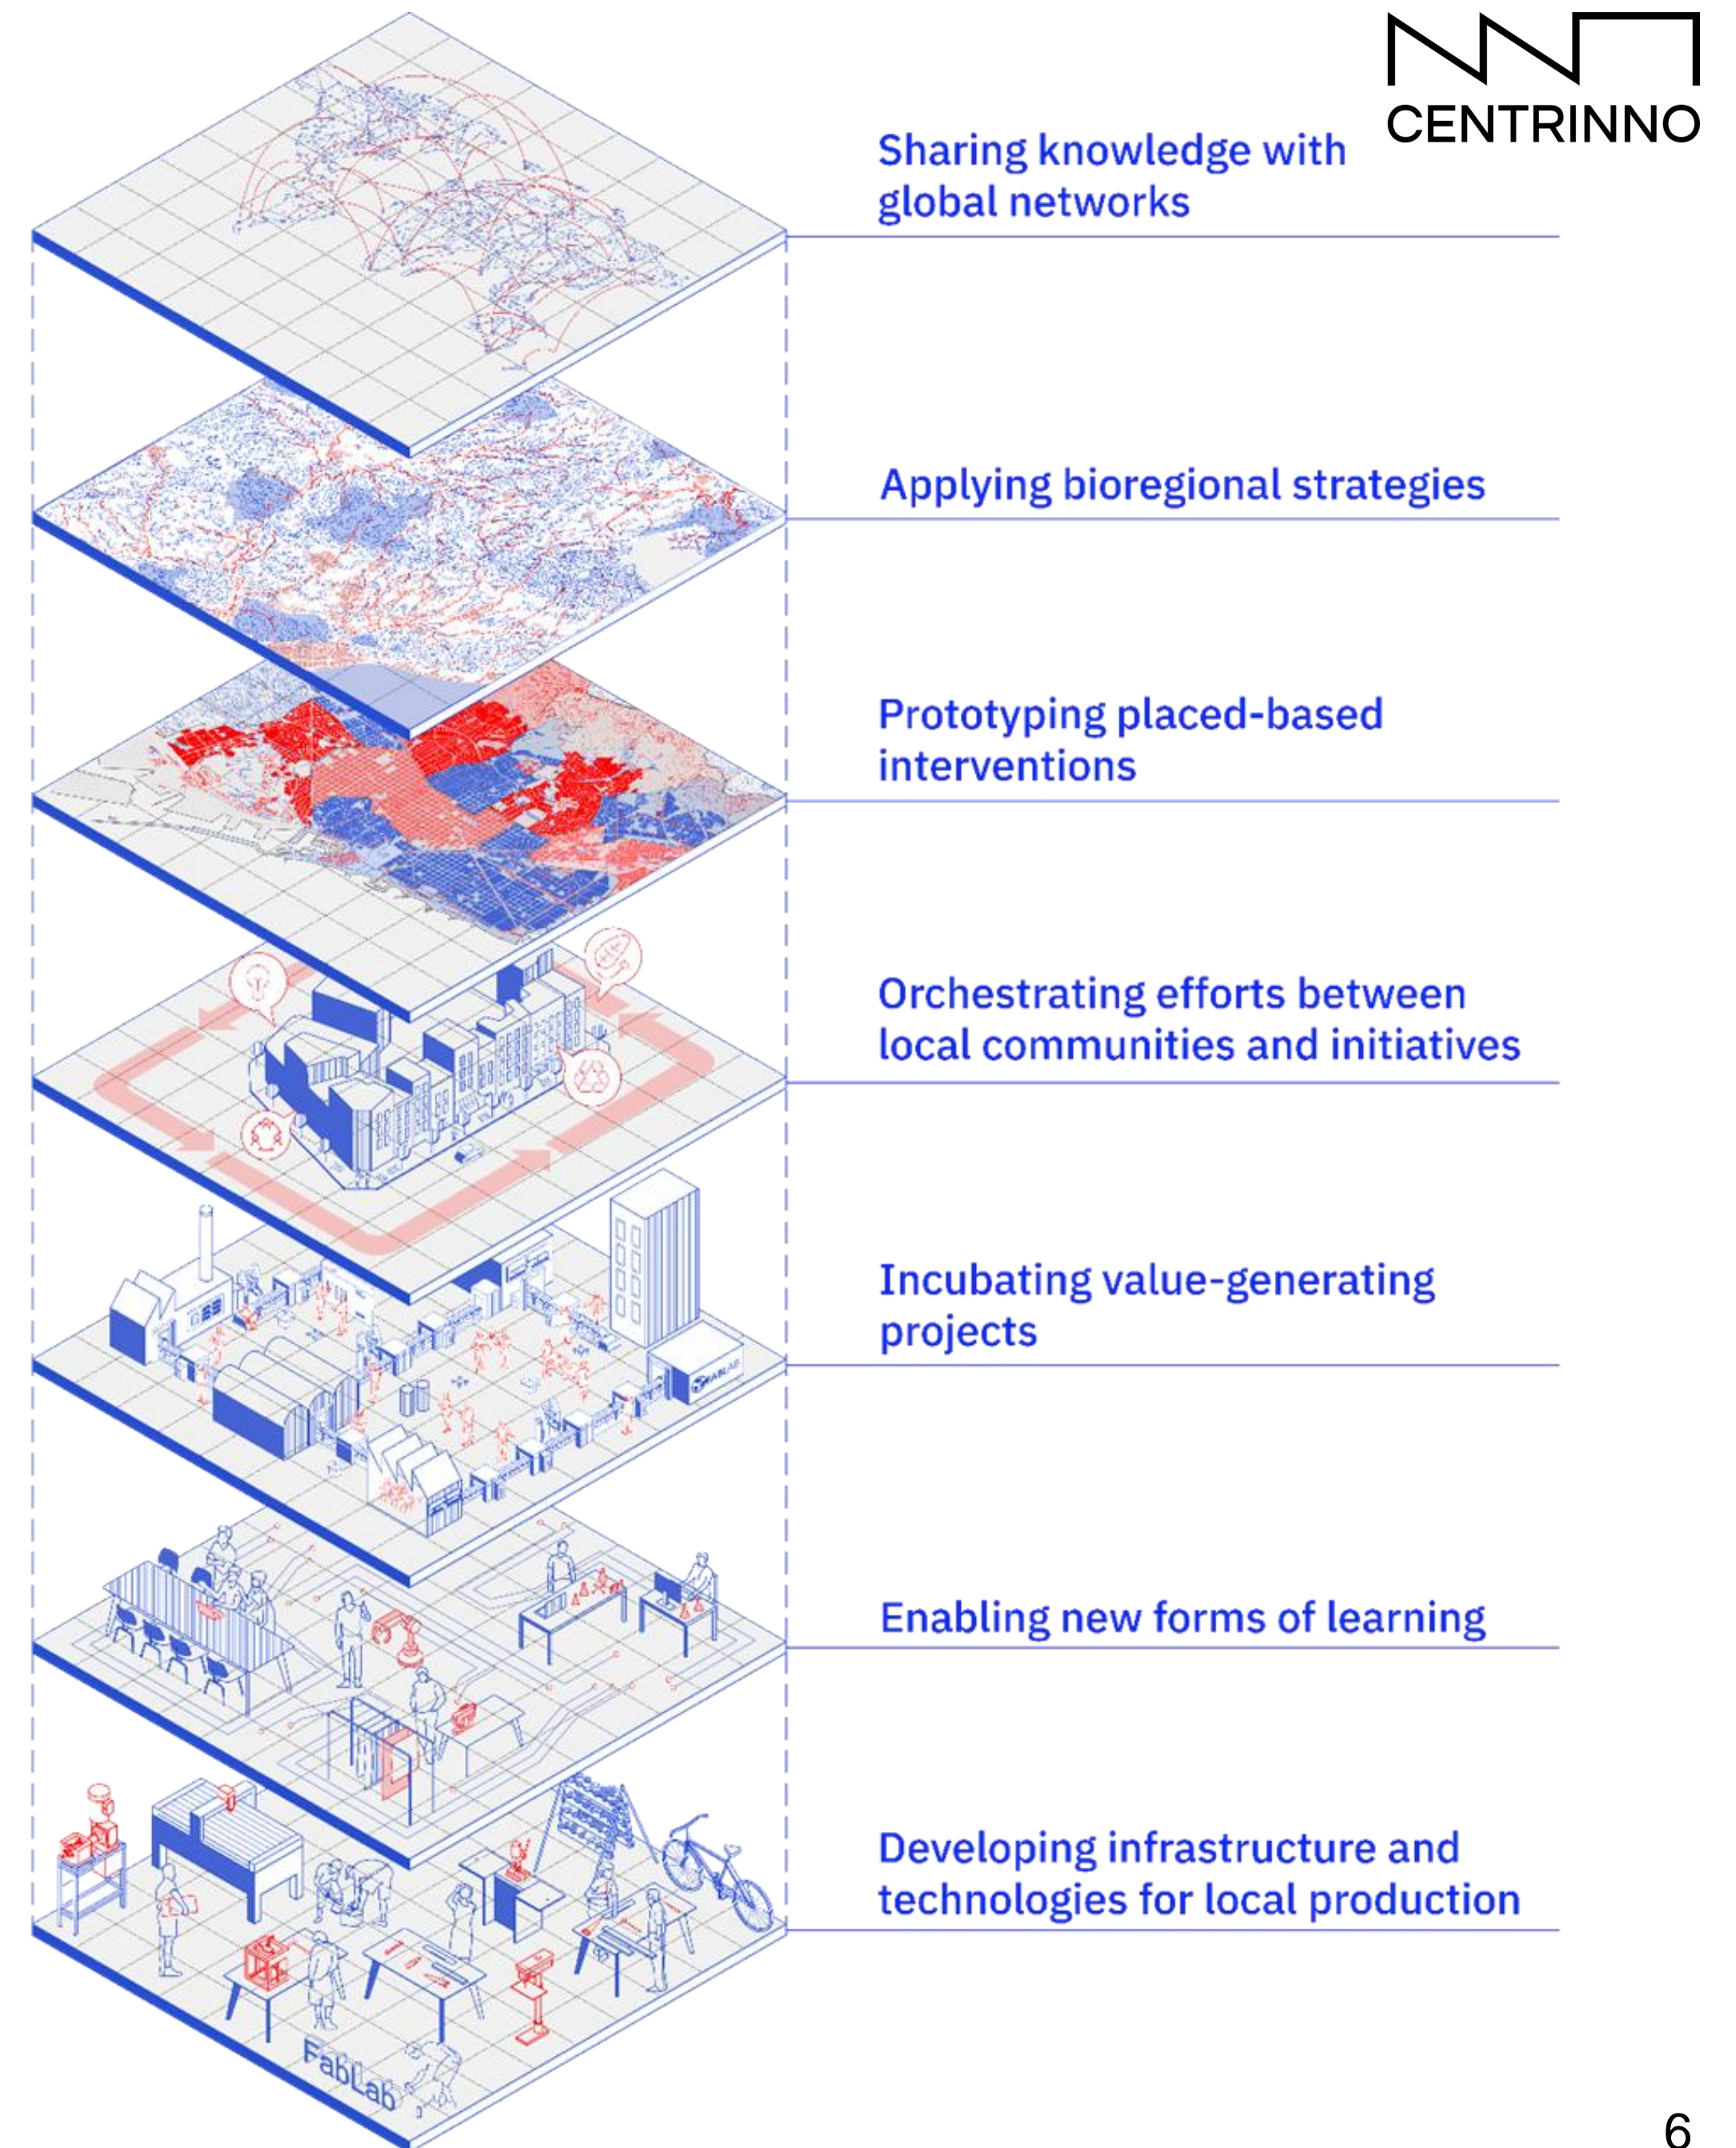

Peer learning within the global Network

- Collaboration and knowledge sharing among peers can lead to a deeper understanding of diverse perspectives and experience
- Peer learning can help to break down barriers and promote understanding between different groups
- It can lead to more cohesive and resilient communities
- Working together in a spirit of collaboration and mutual support can build stronger bonds and create more inclusive environments
